## PROFESSIONAL EXPERIENCE

**UX Designer (Immersive)** 2020  
General Assembly, Remote

Expand tech foundation by developing and executing design projects, integrating wireframing, prototyping, user experience (UX) research, and usability testing. Communicate and collaborate across functional teams, practicing user experience (UX) and user interface (UI) design handoffs. Enhance techniques through continuous learning and improvement. Present design and milestone deliverables to peers. Implement and promote design guidelines, best practices, and standards. **Key Projects:**

- [On The Go LA](#) – Redesigned client website to help local chefs, pop-ups, and restaurants rent their food truck. Tools: Figma.
- [Properlift](#) – Created a mobile app to help users with exercise tutorials. Tools: Figma.
- [Zero-G](#) – created a fitness web app for space travelers. GA Hackathon first place winner. Tools: Figma

**Designer, Product Models** 2018 to 2020  
Enerflex LTD, Houston, TX

Oversaw design and development of multiple product models, testing and debugging to ensure quality results. Gathered and evaluated requirements in collaboration with cross-functional development teams. Championed value of design internal groups, drove best practices. Created compelling design to align company and product brand standards. Tracked product user experience metrics and reports to deliver continuous improvement across model lines.

- Reduced installation and shipping time from two months to average 20 days.
- The creation of design standards helped increase the quality of the products by reducing the amount of errors made on the shop floor by 80%

**Designer, Product Models** 2013 to 2018  
Oil States Inc, Houston, TX

Collected user requirements, integrating user-centered design and user research. Conducted research through established research methodologies. Partnered with internal teams to review, conduct model testing, and debugging.

- Increased shop efficiency on installation and shipment by 90% through implementation of updated designs.

**Additional Experience:** Chemical, Biological, & Nuclear Specialist, US Army
